Senior Computer Programmer / Web Developer Database and Application Developer

*Microsoft .NET – C#, J#, VB.NET / Java / VB / C / HTML
MS SQL / MY SQL / Oracle / SyBase / DB2*

PROFILE

Dynamic 10-year career in software design and development. Constantly researching new technologies, methodologies and ideas in the fields of technology and business.

- Expert in e-commerce design and development. Always developing innovative solutions.
- Outstanding success in customer support, analysis, and efficient solutions.
- Especially well organized with a track record that demonstrates self-motivation, creativity, and initiative to achieve both personal and corporate goals.

Education and Training

- | | |
|------|---|
| 2003 | Stock Market Technical Analysis, John Copp, London, Ontario
Extensive look into how to draw and analyze stock charts.
Instruction and practice in discovering trends and indicators. |
| 2001 | Introduction to .NET Programming, Microsoft, Detroit, Michigan
A highly intense look at the .NET framework and how to program in different languages. Introduction to hand held computer programming, application programming and data manipulation. |
| 2000 | Advanced Website Design, University of Western Ontario, London, Ontario
A look at what constitutes a good web design. Look at trends, colors and fonts, which promote user readability. |
| 1999 | NT Administration Certification, CompuMaster, London, Ontario
Instruction for maintaining a stable reliable system. How to calculate proper IP and subnet mask setups. How to properly plan an effective network. |
| 1996 | Computer Programming Diploma, Georgian College, London, Ontario
Extensive look at business programming, software development and design skills, including Accounting, Marketing and Co-op. |

Technical Skills

Skill Name	Skill Level	Last Used/Experience
.Net	Intermediate	Currently Used / 6+ years
Ajax	Intermediate	Currently Used / 2+ years
ASP, JSP	Expert	Currently Used / 7+ years
ASP.NET	Expert	Currently Used / 6+ years
Business and Needs Analysis	Intermediate	Currently Used / 4+ years
C#, VB.NET, J#	Expert	Currently Used / 6+ years
C++	Intermediate	2 years ago / 3 years
Database Design	Expert	Currently Used / 10+ years
Factory Automation forklift operation	Intermediate	1 year ago / 5+ years
Java	Expert	1 year ago / 5 years
JavaScript/VBScript	Expert	Currently Used / 6+ years
MS Access	Intermediate	Currently Used / 6+ years
My SQL	Intermediate	Currently Used / 4+ years
ODBC	Expert	Currently Used / 7+ years
Project Management	Intermediate	Currently Used / 5+ years
SQL 2005	Intermediate	Currently Used / 1+ years
SQL2000	Intermediate	Currently Used / 8+ years
System design	Expert	Currently Used / 10+ years
Visual Basic	Expert	Currently Used / 9+ years
W3C Standards	Intermediate	Currently Used / 1+ years
Web Accessibility Standards	Intermediate	Currently Used / 1+ years
Web Development	Expert	Currently Used / 6+ years
Website Accessibility	Intermediate	Currently Used / 2+ years
Website Usability	Intermediate	Currently Used / 1+ years
Windows 95, 98, NT, 2000	Expert	Currently Used / 8+ years
XML	Intermediate	Currently Used / 4+ years

Professional Experience

2007 - Present Buckland Customs Brokers, St. Thomas, Ontario
I am currently employed as the Development Supervisor. I report to the Manager of Trade Application Design. My duties include, code quality control, deployment and build management, task assignment and lead application and database designer and development. C#, Java, HTML (ASP.NET), AJAX and JavaScript are the languages that are used most often in my day. We are currently developing under the 2.0 Dot NET frameworks and using the SQL Server 2005 database. I do have experience with the 3.0 framework.

Also gained much experience in EDI formats such as XML, ANSIX12, Edifact and 810 formats. I was responsible for building, designing and instruction of the building of parsers and builders for many formats.

Our major project is an ASP.NET system that allows our data entry clerks to key in shipment entries, submit the entries to Canadian Customs in order to clear trucks at the border automatically.

Key Achievements:

- Built a program called YAFFLE. YAFFLE does three things:
 - Tracks User Activities on the local workstations. Records time logged in, logged out, locked and unlocked.
 - Used for attendance tracking
 - Used for an In/Out board which is built in ASP.NET
- Assisted in the design and build of an Client focused Entry Portal
- Lead Developer and Designer for the primary application which aids in the clearing of trucks and the borders. Responsible for assigning tasks, creating application builds, testing, code quality and the bulk of the UI and business logic development. I also played the primary role of database development. This project also had the requirement of an in-house document management system to help save cost. The document management system was done using asp.net, SQL2005 and a Microsoft Fax server.
- Built a code generator which builds c# code that represents database objects based on database objects. This code generator has decreased development time by 20% and provides a common database interface.
- Built a pre-arrival system which integrates with US Customs eManifest system.

2004 - 2007

ICINITI Corporation, London, Ontario

Senior Web Developer for using ASP.NET. Developing e-commerce solutions for large and small companies. Manage personal projects, develop new modules, support existing projects and train customers.

I often talk to clients to determine their needs and write statements of work which are to be understood by developers and non-developers.

Key Achievements:

- Help achieve a standard development product to develop websites from. Project known as BaseProduct.NET

- Developed tools and interfaces that aid in the management of the e-commerce sites.

1994 – 2005

PW Consulting, London, Ontario

Own and operated PW Consulting. Delivered IT solutions to mid-sized and large companies from around the world. Specialized in AS400, Web and PC integrations.

Key Achievements:

- Built an impressive customer list including Montserrat Water, Montserrate Electric, Pass & Seymour LeGrande

- Sold Company

- Continue sub-contracting for the current owner.

Professional Experience

- 2000 – 2004 LCS Software Inc. (LINK+ Customs Brokerage), London, Ontario
Senior Developer, Customer Support and Technical Support specialist.
Key Achievements:
- Converted an old Canada Customs gateway software to JAVA.
 - Converted JAVA Canada Customs gateway software to VB.NET
 - Rebuilt the CLVS module (Courier Low Value Shipments)
 - Rebuilt parts of the B3 to increase usability
 - Customer's Installation and Support
 - Built RNS (Release Notification System) to be used by online account holders and other Customs Brokerage (<http://www.rns.ca/>)
 - Helped maintain BP2000 (LCS) broker software.
- 1997 – 1999 Executive Publications Inc., Cambridge, Ontario
Designed and developed software that integrated to factory automation equipment. Supported and trained customers and their workers.
- Key Achievements:
- Developed Die Wash software that integrated to a fully automatic Die Wash System for the Ford Motor Company. Controlled multiple axes, delivered parameters for each die and any special instructions.
 - Developed Die Storage software that integrated to a fully automatic Die Storage System for the Ford Motor Company. Dies were stored in vertical shelves and cataloged by the software. Software delivered location and special instructions for retrieving and storing dies.
 - Developed Blank and Die Storage System Software for Daimler Chrysler. Conducted FIFO storage rules for storing materials and optimized storage for space. Cataloged die locations and delivered special instructions.
